PROFILE

Software engineer in Kumasi, Ghana. I design and build websites, web applications, and product interfaces that feel clear, calm, and carefully made.

I partner with businesses that want a modern presence and software people enjoy using, from the first sketch through launch and the care that follows.

CAPABILITIES

- Business websites and brand experiences
- Web applications, dashboards, and internal tools
- Interface design, interaction, and thoughtful motion
- APIs, data, and mobile-ready front ends

SKILLS

JavaScript, TypeScript, React, Next.js, Node.js, Python, PostgreSQL, HTML, CSS, UI/UX design, REST APIs, Git, Figma, Tailwind CSS

EXPERIENCE

Present - Software Engineer, PixelForge, Kumasi, Ghana

Design and engineer websites, web apps, and digital products. Lead the work from structure and interface through build, launch, and refinement.

Ongoing - Product engineering with client teams

Dashboards, commerce flows, booking tools, and marketing sites, with care for accessibility, speed, and code that other people can maintain.

Foundation - Software engineering and interface craft

Continuous study and hands-on practice across design, frontend engineering, and backend development, applied on real builds.

SELECTED WORK

Kente Market - Multi-vendor marketplace. React, Node.js, PostgreSQL
ClinicFlow - Clinic appointments and reminders. Next.js, PostgreSQL
Ashanti Ledger - Shop finance snapshot. TypeScript, React
Campus Nest - Student housing finder. React, Maps, Node.js
Adinkra Studio - Editorial brand website. HTML, CSS, JavaScript
SwiftHaul - Delivery tracking for local logistics. React, Node.js, SMS

WORKING TOGETHER

Discover the real problem. Shape a calm interface. Build it properly. Stay close after launch.
